HMF Smart Solutions Debuts at Middle East Energy 2025

Bad Münden, 27. March 2025

HMF Smart Solutions is thrilled to make its debut as an exhibitor at Middle East Energy 2025, from April 7 to 9 at the Dubai World Trade Centre - proudly joining the prestigious German Pavilion (H1| G36) to showcase smart critical communication solutions for the energy sector on a global stage!

Discover HMF's TOP 3 critical communications solutions for MEE:

ACCESSNET® MCX - Uncompromising mission-critical broadband communication

The pioneering MCX communication solution from HMF Smart Solutions delivers mission-critical multimedia communication services in line with the 3GPP standard that have been designed specifically for the needs of professional users. ACCESSNET® MCX ensures seamless communication, rapid response to emergencies, and real-time data sharing, minimizing downtime and operational risks. It supports worker safety, improves coordination, and optimizes resource management. With advanced features like priority access and encryption, these services enhance resilience against cyber threats and infrastructure failures. By leveraging ACCESSNET® MCX, energy companies can maintain stable operations, respond effectively to incidents, and ensure uninterrupted service delivery in an increasingly complex and digitalized environment.

ACCESSNET®-T IP – TETRA communications for extreme conditions

Professional communication systems for the oil & gas industry must withstand extreme conditions. ACCESSNET®-T IP – HMF's TETRA

infrastructure, engineered in Germany – has been intensively proven in these environments. It offers high levels of performance even under heavy load, through excellent radio coverage with consistently high sound quality.

ACCESSNET®-T IP is characterized by its high levels of availability and security and its system stability. In addition, this scalable TETRA communication solution can significantly increase productivity and minimise risks through better workflow coordination capabilities, direct and fast communication with employees and the ability to network different locations.

TETRA-over-satellite – Rapid deployable network extension

TETRA-over-satellite from HMF is a rapid deployable, mobile communication solution for emergencies or construction sites that offers location-independent communication even to existing TETRA networks. This innovative solution enables flexible expansion of network coverage via satellite technology - especially in remote areas or in the event of a disaster.

HMF Smart Solutions will be exhibiting in the German Pavilion in Hall 1, Stand G36.

About Middle East Energy

Middle East Energy is a premier global energy exhibition and that brings together over 40,000 energy professionals and 1,600 international exhibitors to showcase and discuss advancements across six key sectors: smart solutions, transmission and distribution, renewable and clean energy, critical and backup power, energy consumption and management, and battery and e-mobility.

About the German Pavilion

The German Pavilion is the official joint stand for German companies at trade fairs worldwide, organized as part of the Federal Government's foreign trade fair program. Exhibitors showcase their products and services under the "Made in Germany" brand. The program is funded by the German Federal Ministry for Economic Affairs and Climate Action (BMWK) and supported by industry associations.

About HMF Smart Solutions

HMF Smart Solutions (HMF), based in Bad Münde, Germany, has been developing and implementing customised, critical communication solutions in the field of professional mobile radio for more than 40 years. HMF is a well-known specialist in technologies such as TETRA and LTE/5G and offers highly available and secure radio communication solutions for

industrial, utility and transport companies, the oil and gas industry as well as security and emergency services, among others. HMF regards itself as a holistic solution provider whose core expertise is comprehensive project support from a single source – from development and planning to implementation, including services and network operation.
