HMF Realigns Its Technology Leadership

Bad Münden, 2. April 2026

Hauke Holm Returns as CTO to Drive Innovation Agenda

HMF Smart Solutions is strategically realigning its technology organization: as of April 1, Hauke Holm has returned to the company and, as Chief Technology Officer (CTO), assumes a central role in advancing the company's solutions and product portfolio.

Holm brings more than 20 years of experience in critical communications. He represents a strong combination of deep engineering expertise, strategic vision, and a clear focus on execution. His mission: to further develop proven technologies, accelerate new software-driven approaches, and consistently align innovation with the needs of customers and partners.

"I'm very pleased to return to a company I've had the opportunity to help shape extensively, and to take on this responsibility in a new role," says Hauke Holm. "I'm especially looking forward to working closely with the team again, further integrating technological excellence, market proximity, and sustainable growth, and actively shaping the future of critical communications."

Holm's return comes at a time of increasing technological and regulatory momentum: cyber resilience, NIS2, KRITIS requirements, and the AI Act are fundamentally reshaping the framework for providers of critical communications. At the same time, the global threat landscape from cyberattacks is intensifying significantly. While Holm will be responsible for advancing TETRA and MCX solutions as well as the company's strategic technology direction, Gerald Nolte, in his roles as Chief Information Security Officer (CISO) and Chief IT Officer (CIO), will focus on strengthening cyber defense, further

developing the IT architecture, and integrating security and AI topics into the overall strategy.

“We are responding to the growing demands for security, regulation, and digital sovereignty,” says CEO Martin Hucke. “With Hauke Holm and Gerald Nolte leading our technology divisions, we have created the conditions at HMF to further drive innovation, security, and growth in equal measure—and to continue supporting our customers reliably and with outstanding expertise in an increasingly challenging environment.”

About HMF Smart Solutions

HMF Smart Solutions (HMF), based in Bad Münden, Germany, has been developing and implementing customised, critical communication solutions in the field of professional mobile radio for more than 40 years. HMF is a well-known specialist in technologies such as TETRA and LTE/5G and offers highly available and secure radio communication solutions for industrial, utility and transport companies, the oil and gas industry as well as security and emergency services, among others. HMF regards itself as a holistic solution provider whose core expertise is comprehensive project support from a single source – from development and planning to implementation, including services and network operation.
